### Erratum to: Philos Stud DOI 10.1007/s11098-016-0852-7

In the original publication of the article in the section, “Perfect naturalness and supervenience,” the third paragraph that reads as: “Let  $\phi$  be a set...supervenience:” should read as: “Let  $\phi$  be a set of properties and relations. Let a  $\phi$ -preserving isomorphism be a bijective function  $f$  from the domain of  $w_1$  to the domain of  $w_2$  such that for any  $\langle x_1, \dots, x_n \rangle$  in  $w_1$  and any  $n$ -place property or relation  $R$  in  $\phi$ ,  $\langle x_1, \dots, x_n \rangle$  instantiate  $R$  iff  $\langle f(x_1), \dots, f(x_n) \rangle$  in  $w_2$  instantiate  $R$ . Now consider the following three notions of global supervenience.”

The sentence in the last paragraph under the section “Background” that reads as: “I do not...harmless.” should read as: “I do not assume that for any region  $R$  that is a sub-region of  $R'$ ,  $R$  is a part of  $R'$ , though that assumption is harmless.”

The following reference was missed out in the original publication.
