Issues in Science and Theology: Nature – and Beyond

Transcendence and Immanence in Science and Religion

Series: **Issues in Science and Religion: Publications of the European Society for the Study of Science and Theology**

- **Scholars from a range of academic disciplines discuss human uniqueness**
- **Spans a variety of perspectives - scientific, ethical, philosophical and theological**
- **Selected papers from the 2018 conference of the European Society for the Study of Science and Theology (ESSSAT)**

This book addresses a variety of important questions on nature, science, and spirituality: Is the natural world all that there is? Or is it possible to move 'beyond nature'? What might it mean to transcend nature? What reflections of anything 'beyond nature' might be found in nature itself? Gathering papers originally delivered at the 2018 annual conference of the European Society for the Study of Science and Theology (ESSSAT), the book includes contributions of an international group of scientists, philosophers, theologians and historians, all discussing nature and what may lie beyond it. More than 20 chapters explore questions of science, nature, spirituality and more, including Nature – and Beyond? Immanence and Transcendence in Science and Religion Awe and wonder in scientific practice: Implications for the relationship between science and religion The Cosmos Considered as a Moral Institution The transcendent within: how our own biology leads to spirituality Preserving the heavens and the earth: Planetary sustainability from a Biblical and educational perspective Issues in Science and Theology: Nature – and Beyond will benefit a broad audience of students, scholars and faculty in such disciplines as philosophy, history of science, theology, and ethics.
