

Corona Phenomenon

This book is the outcome of one of the most extensive international academic projects on the COVID-19 pandemic in the field of humanities and social sciences. It includes the reflections of scholars from 25 universities, in Europe, Asia, Canada, Australia, the US, and the UK, on 60 important philosophical and political questions. This paradigmatic volume is unique in the history of the humanities and social sciences in dealing with pandemics and should be considered as a starting point for more coherent and synergistic academic cooperation in preparation for similar future phenomena.
