

Anthony N. Skarvelakis

The Colors of The Sunrise

Anthony N. Skarvelakis

Licensed Social Worker (DIPSW,PQ,HASW)

Writer-Researcher (Cognitive Science, Social Science)

Founder of A.I Psych approach

Acknowledgements

I would like to thank everyone that keeps standing by my side to this travel in life. The people that supported me and those that had the courage to give me power in difficult moments.

Many thanks go to those that believed and supported the vision of A.I Psychotherapy.

My way of thinking regards love as an indispensable science that a human can learn without denying their reason and cognition. The reason for being rejected and dismissed as a course in the Universities is that it makes me recommend that the scientific foundations of its “logic” can bring us closer to the unconscious part of our cognition and our repressed self.

After this and acquiring self-knowledge, we’ll have a more substantial capacity to see the A.I technologies, robotics, and intelligent technologies as a part of our repressed nature in the present high-tech era.

Many special thanks go to people around the world from Japan to California and Brazil to Australia that have supported my writing and articles and for their trust to stay positive to my idea toward an A.I Psychotherapy approach.

To all the Cognitive Scientists, Psychologists, Art Therapists, Social Scientists, Psychologists that encouraged my ideas in any manner.

Many thanks also go to:

Dr Chris Tsokos, President of I.F.N.A, Distinguished University Professor of U.S.F, Chief Editor, Probability & Statistics, Atlantis Press for becoming my reference supporting my search for Ph.d.

Christine Kujawski, M.A. CCC-SLP, for her reference and support.

Dr Hiroki Kotabe, Author, Ph.d in Psychology, Founder of Kotabe Labs.

Professor Nick Travlos, Phd, Mphil, MBA, for consultation to academic issues.

Patricia Benesh, E.d.D, Founder of the Author assist for consultation regarding the publishing.

Dr Raeesa Gupte, Neuroscientist, for her willingness to edit the book.

Dr. Avgoustos Tsinakos, I.H.U-Athabasca University, Director AETMA lab, for all that he has done as a professor and reference.

Dr Jeniffer Marler, MD, Surgeon, Scientist, Director of Doctors with disabilities for her willingness to support me by any manner.

Janina Diaz-S., ATR-BC,LCAT, for her comments in my posts-articles.

Akira Olsen, PsyD MA, professional contact, for her articles that share the same interests regarding A.I therapy, art therapy, psychotherapies.

Thanks also to the following people for being active professional contacts: Garrett Ochs, Max Tegmark, Jonathan Schooler, Fjola Dogg Helgadóttir, Jeffrey Lieberman, Rhonda Freeman, Sean Keller, John Kontaris, Joy Buolamwini, Jocha Bach, Stella Jones, Vivian Xe, Judy Rubin, Ellen Langer, Barton Goldsmith, Aaron S.Kemp, Bob Cooke, Gerry Koocher, Humberto Rodrigues, Yiannis Aloimonos, Guillaume Dumas, and all the others that I cannot mention here.

All my friends and peers in California, Boston, New York, Washington, Florida, Indiana, Michigan, London, Spain, India, and the rest of the US states. To the professors of the Cognitive Science program of the University of California Santa Barbara, Case Western University, University of California San Diego, Sussex University, Indiana University, Tufts University as a big part of my research have been based on the curriculum of their programs.

To the contacts colleagues, peers, and professors at MIT, Harvard, Oxford, London, and in the Universities and Institutes at Edinburgh, Germany, Holland, Belgium, Switzerland, Italy, France, China, Australia, Canada, Sweden, Argentina.

Contents

ACKNOWLEDGMENTS

PART I:

A. Recommended reading methods

Chapter 1. How it works-Suggestions for acquiring the best therapeutic result and benefit from the book.

1.1.The Writing method-Incorporation of music-Relief of symptoms-Perceptual information.

1.2. Psychotherapies-Human person. Cognitive functions and patterns- The “Here and Now”-Relation with Emotion/Cerebrum functions.

Chapter 2. Recommended techniques and methods.

2.1. Methods Gestalt therapy-C.B.T-Dance therapy. The meaning of existence. Human existential questions answered utilizing knowledge by theories globally.

2.2. How to read the parts of the Book and the Narrative.
Techniques in Teamwork and Group therapy with the use of art
and music.

B. Introduction to the series of books

Chapter 3. Description of the Series-Section I

3.1. Association of Logic and Cerebrum functions. A.I

3.2. The Lacanian object- Hermeneutics- Computational
Algorithms. The Psycho-patho-logical interpretation.
Psychoanalysis and Cognitive Science.

3.3. The Clinical analysis - Human rights and Personality
characteristics. The united potentials of structures.

Chapter 4. Description of the Series-Section II

4.1. Human Cognitive System (Information-Data-Elements).
Semiotics, effects on the Neurodevelopment-Frontal lobe,
Cerebrum architecture & hardware-The Cognitive Program
based on the A.I model as a solution-The concept of
Intelligence.

4.2. The reconstruction of Logic – The Architectural
framework- Research in Cerebrum and Brain function-

Investigations from many Scientific fields-Ontological choices and Neuronal plasticity-Lived experience, polarization, dichotomy, splitting.

Chapter 5. Description of the Series-Section III

5.1. AI unites the split structures-New Cognitive Schemas-Formal, applied, and natural sciences-The psycho-pathology and the association of cerebrum, body, senses, and soul.

5.2. A Cohesive view in Sciences, Philosophy, and Perception. The Cognitive Logic Metaprogram.

C. Main Part of the Book (Human Cognition-Philosophus and A.I in the Logic Universe-Toward A.I psychotherapy).

Chapter 6. Main Part of the Book.

6.1. How Cognitive Science, A.I theory, and their methodology support the application of the A.I Psych model in psychotherapy and the healing of mental disorders.

6.2. Chinese room, Consciousness, Strong A.I, and A.I Psychotherapy-Building a program that supports the mind-How A.I Psych model is designed-Machine intelligence & A.I Psych.

PART II: Narrative

Chapter 7. Narrative-Section I: Reconnecting the Inner and Outer Reality through the senses and perception.

Chapter 8. Narrative-Section II: Approaching the body. Advanced united perception with vision, Cognition, and senses.

Chapter 9. Narrative-Section III: Freedom from the Fragmentation and the Dysfunctional Understanding of the world. Toward Your Liberation-The acquisition of Independence. Becoming You again.

Chapter 10. Narrative-Section IV: Developing a clear perception of the Self and the Others through the acceptance of the Human Universal Logic-

Acquisition of empathy and freedom from the
Narcissism.

Chapter 11. Narrative-Section V: The investigation
of Your road. Your Infinite Potential-The Real
Nature of Being and of the Existence.

PART III: Scientific Analysis-Explanations

Chapter 12. Scientific Analysis-Explanations on
Chapter 1.1 to Chapter 2.1.

12.1. Scientific Analysis-Explanations on Chapter 1.1 (notes
1-5):

Expressive art therapy-Digital art therapy and technology.
Music therapy and its effects on many systems. Multiple
Intelligences-Amygdala, brain regions, memory, attention.
Symbols and art, language, myth.

12.2. Scientific Analysis-Explanations on Chapter 1.2 (notes
6-7):

Embodied perception, art, music, literature-Psychoanalysis
and C.S.- Human "logos", Narrative & linguistic patterns-
Arguments, Axioms, Schemata, Symbolic artificial language-

The defense mechanisms-Synaptic connectivity in psychotherapy, healing process-Physical level and algorithms.

12.3. Scientific Analysis-Explanations on Chapter 1.2 to Chapter 2.1 (notes 8-9):

Space and time globally in History-Time studied by Philosophers, Scientists, and Psychologists-Time in Psychiatry and Phenomenology-Dance therapy effects-The kinesthetic experience, the receptors, touch, sound, vision, body image, memory.

Chapter 13. Scientific Analysis-Explanations on Chapter 2.1 to Chapter 3.2.

13.1. Scientific Analysis-Explanations on Chapter 2.1 to Chapter 2.2 (notes 10-11):

Semantics-Pragmatics, Decisions in responsibility. Information from consciousness, logic argumentation-Robot/machine system-Society networks-ELIZA, the language of art, the blocked feelings-Trauma, medication.

13.2. Scientific Analysis-Explanations on Chapter 3.1 (note 12):

The Cartesian dualism-Whole, Embodied mind-Artificial Intelligence, Research at interstices, Psyche-soma-The philosophical syllogism.

13.3. Scientific Analysis-Explanations on Chapter 3.2 (note 13):

Epistemology and the Unity of Science, The Critical theory- Natural, Formal, Applied Sciences-Schemata Chomsky and Piaget-Laing, Szasz, Buscaglia, Foucault, Russell-Nervous System, automaton-Cosmology, Biology, Archaeology.

Chapter 14. Scientific Analysis-Explanations on Chapter 3.2 to Chapter 5.1.

14.1. Scientific Analysis-Explanations on Chapter 3.2 (note 14):

Human Brain. Neurotransmission, The Subcortical structures, hemispheres, brain damage, behavior, assessment, brain stimulation- Love, Pain, Sexual behavior. Hypothalamus, Cingulate cortex. Personality-The Unconscious access, deeper layers, anatomy, kinematics, medicine, electrophysiological function- Stoics, Berkeley, Darwin. Personality Disorders, Sublimation of passions- Love body, ultimate level of cognitive development-Shaping the global structures.

14.2. Scientific Analysis-Explanations on Chapter 3.2 (note 15):

AI Psychotherapy & Politics, Universal Declaration of Human Rights, International Logic-The Universal Stereotypes and the Linguistic Patterns. Lacanism, Structuralism, and the A.I model-Role of Natural Language Processing in A.I Psych.

14.3. Scientific Analysis-Explanations on Chapter 4.2 to Chapter 5.1 (note16,17,18):

Robot, Human Vision, Theories of Perception & A.I model. Architectures, Engineering, Programming, Software/Mindware, and Design of Intelligent models based on A.I Psych-Logic as Archetype and its application-C.S and the multisystemic standpoint, Artificial Intelligence.
