In our attempt to explore possible solutions for the world's grave environmental problems, our book titled [Better economics for the Earth](#) [1] proposes a new approach to understanding and redefining value. A good explanation is [provided in Tran](#) (2025), which informs us that the current approach to understanding value has been criticized for trying to “put a price tag on nature” without fundamentally challenging the underlying economic paradigm [2].

To further support the process of change, concerning our understanding value, we now introduce [a new paper](#) bearing in mind that “the devil's in the details” [3].

The manuscript can also be read [here](#) [3]
