About the Author

Scott D. G. Ventureyra (PhD, Carleton University in Ottawa) is the author of several books, including *On the Origin of Consciousness*. He has written for several academic journals, magazines, and newspapers. He has presented his research at conferences around North America, including the Science of Consciousness in Tucson, Arizona.

Making Sense of Nonsense: Navigating Through the West's Current Quagmire

For those who feel vaguely uneasy about the current direction of our culture and our politics, but can't put their finger on the problem, the fifty-five chapters of this book are a wake-up call, and they bring into focus reasons for our current malaise. The editor and principal author, Scott D. G. Ventureyra, is joined by more than twenty others who explore perennial themes of philosophy and theology enlivened by accounts of personal experience in the quest for the true and the good amidst the drama of the decay of the West. Topics range from faith and science to gender ideology to the attack on freedom and dignity of persons, to COVID-19 and the New World Order. Pick this volume up for a lively discussion of the distemper of our times, and for reflections on the prospects for redemption.

—David J. Klassen, LL.B., Ph.D.

The Western world is intent on defeating reality to vaunt utopian narratives. The authors of this impressive work offer a necessary assessment of this “culture war,” while also forging a path for a return to the essential and eternal truths of human existence. A copy of this notable book should be on every shelf.

—Nirmal Dass, publisher, *The Postil Magazine*

I knew something was deeply wrong with the world prior to 2020, but 2020 confirmed it. With the changes in views about sex, marriage, and the economy, we are seeing a direct confrontation with traditional Western Christian values. This continues to be confirmed for those who have eyes to see what politics, medicine, science, and technology are doing to cultural consciousness led by globalist elite groups (just read the Davos report for yourself!). This really hit home for me when politicians told us in Spring 2020 that all the hospitals were full to capacity with COVID-19 patients and I was not permitted to visit my father in the intensive care unit. Well I gained entrance, and what I saw was shocking! It was largely empty! The politicians were lying. And, many were buying it! What was really happening was a wholesale neglect with no process in place to treat COVID-19 patients. This coupled with the ongoing race riots and the constant in your face challenge to traditional ethics of both sex and Western values. All of it is a part of a reset. A reset of values with the intent to replace Christian foundations through coercive tactics. We are experiencing this now in the society as well as in our evangelical churches. *Making Sense of Nonsense* confronts many of the issues, motivations, and challenges that continue to upset not only our economy and social interactions but our values. With an honest look at the issues from a variety of perspectives, *Making Sense of*

Nonsense will furnish the reader with a host of issues backed by research that aid us in thinking better about the problems in medicine, technology, economics, society and how they are interwoven, so that we might be better equipped to engage the new world staring us square in the face. The motivations are no longer disguised attempts to deceive. At best the motivations are hidden in plain sight for all to see. For those who have ears to hear, let him hear and see the nonsense before us.

Epilogue

Where Do We Go from Here?

Scott D. G. Ventureyra

Over the past few weeks, I have chronicled some of the important events that have come to shape the direction of this spiritual battle. On March 4, 2022, I decided to stop making additions in order to finally publish this book. As I mentioned in the Preface, this book will serve as a historical witness to what has transpired right before our eyes. It exposes the machinations of governments, health organizations, the globalist elites, Big Pharma, Big Tech, and the legacy media. Everything has come to this pivotal moment in history.

The West is crumbling at an accelerated rate. The unfolding erasure of history, objective morality, and truth has paved the way for our current predicament. We are now standing at the precipice of the future of human civilization. As we have seen, the attacks on the human person are unrelenting, malicious, multifaceted, and wide-ranging in their scope and breadth, from the time prior to birth until the moment of death. If you are granted the “right” to live, then you must be prepared for unending assaults on your, mind, body, and soul. Nevertheless, the spirit of man and the greatness of God are infinitely greater than any of these assaults.

Within less than two years we have seen the ever-hastening erosion of our civil liberties. Bodily autonomy and freedom of conscience are constantly under siege. The reckless ways in which our governments, medical establishment, judicial system, media, and Big Tech are colluding and working against sovereign citizens of the world presents an unprecedented attack on the human person. The only thing that supersedes the ignorance of such people is their arrogance, as we have seen from those who genuflect at the altar of COVID, regressive ideologies (woke culture, political correctness, identity politics, socialism, communism, etc.), the follies of scientific materialism, and sheer human depravity. Silence and dismissal of what is happening right before our eyes will make us complicit in the ever-enveloping moral evil that is penetrating the hearts of men and women at exponential rates. So, how do we make sense of the nonsense? Through our experience of the world. We must use legitimate science, not politicized science. We must be willing to follow the evidence wherever it leads. We mustn't deny our human experience of the world since we

are composite beings of mind, body, and soul. Thus, the phenomenal experience of the world (the five senses) works in unison with the intellect (the rational; capacity for logic) and through our will act to bring about the maximum good in the world. An adherence to the natural law where all humans have inherent rights granted to us, not by legislation, but by God. Under natural law, our civil laws are based on morality, ethics, and what is intrinsically right. This is opposed to what is known as “positive law” or “man-made law” as defined by statutes and common law, which increasingly have not come to reflect the natural law, as has become more evident in the moral decadence of the West and in this false pandemic. These aspects of human existence make us fully human. This is the essence of the *imago Dei* (image of God). We must be vigilant and follow God, the Bible promises that as you draw closer to Him, he will draw nearer to you (Jas 4:8).

By way of regressive ideologies, the eradication of truth and God in the education system, the propagandizing of socialism, the degradation of life, the human person, and the trampling of our civil liberties, we are ushering an era of global communism. If people don’t unite and speak up, politicians, media personalities, and others who are subservient to the globalist elites, will continue to live lives of luxury, while the rest of us, “we the people,” will suffer under their totalitarian rule. What is coming with the Great Reset includes: loss of property, wealth, and job opportunities, more mandates, more passports, more restrictions, social credit scoring, and the loss of basic human rights for those who are not subservient to this Globalist Agenda, also known as the New World Order.

Given the current cultural and political trajectory, we can say that historical progress is not linear but cyclical when we carefully learn from history and the persistence of reoccurring dark periods in human history, as evident in the stigmatization of certain groups. Most humans that do not ground the experience of the world in God, truth, and the natural law, surrender to their tribal proclivities towards groupthink which are susceptible to repeat the mistakes of the past. The regressive “woke culture” is an example of this. The woke phenomenon, much like the COVID madness, is one plagued with censorship and punishment for dissent. This is similar to what happened in Nazi Germany, the Soviet Union, and currently in Communist China.

The atheist Richard Dawkins may have some insight here when applying one of his sayings to the inanity of regressive ideologies and the blindness of the COVID dystopian delusion: “It is absolutely safe to say that if you meet somebody who claims [to believe in wokeness and the COVID single narrative], that person is ignorant, stupid or insane (or wicked, but I’d rather not consider that).”¹ Although Dawkins had evolution deniers in mind, I think this quote

1 Richard Dawkins, “In Short: Non-Fiction.” *New York Times*, April 9, 1989. <https://www.nytimes.com/1989/04/09/books/in-short-nonfiction.html>.

fits quite nicely with the drone-like unthinking compliance and mass formation psychosis we have seen.

It is important not to ignore or underestimate the role relativism and scientific materialism have played in the destruction of core Judeo-Christian principles. These core principles are ways of combatting the malaise and various maladies we face in the West. Systemic corruption and outright evil have played in this current nightmarish psychosis of the twenty first century. This is found in all of the godless, materialist philosophies which guide nihilistic ideologies, including abortion, child abuse and sacrifice,² attacks on the family, on the freeness of the individual, gender ideology, and the COVID-19 medical tyranny. Make no mistake, the world is in a diabolical trance. Will reason, arguments, evidence, and adherence to objective moral values and duties save us from this quagmire? I don't know. Even though $2+2$ still does not equal 5, it seems that that alone cannot save us. At least not until people wake up from their slumber. When falsehoods are so rampant, the truth becomes incomprehensible. Our individual and collective eyes distort reality because of our fallen nature, but God unveils the truth to us by His salvific gift and aptitude to see the truth.

No matter how desperate a situation may get, we must accept that every event that unfolds is part of God's eternal plan: "For my thoughts are not your thoughts, neither are your ways my ways," declares the Lord. 'As the heavens are higher than the earth, so are my ways higher than your ways and my thoughts than your thoughts'" (Isa 55:8-9). We must discern the role we play in God's plan. The question is: will we choose to embrace it or oppose it? People's dormancy and willful ignorance will not absolve them. There is no neutral position in the face of injustice; silence is complicity. Au fond, as I have said before, this is a spiritual battle, and this is the best way to understand what is transpiring throughout the globe. People are making choices and choosing sides. The apostle John puts this in the simplest of terms: "We know that we belong to God, and the whole world is under the power of the evil one" (1 John 5:19). We either choose between the world (Satan) or God and His Kingdom—

2 At the end of 2021, Ghislaine Maxwell was convicted of recruiting and grooming teenage girls for Jeffrey Epstein. Although doubtful, the hope is that she will bring down all the "elites" that frequented Epstein's Island and engaged in pedophilic activities with underage girls. Prince Andrew has renounced his military affiliations and royal patronages amidst a sex abuse lawsuit. Unfortunately, it is most likely Maxwell will be used as the scapegoat for many other politicians and celebrities that frequented the island. See Victoria Bekiempis, "Ghislaine Maxwell found guilty in sex-trafficking trial." *The Guardian*, December 29, 2021. <https://www.theguardian.com/us-news/2021/dec/29/ghislaine-maxwell-sex-trafficking-trial-verdict>.
