a circle

joins and separates

and

therefore

is responsible

for

any

X and Y

(every)

X and-or Y

yin and yang

(ancient)

is

zero and one

(modern)

circumference and diameter

of

an

always-conserved

circle

making

'two'

the minimum

and

the maximum

and thus

the only

number

in

Nature

when you see a line

you're seeing

a (hidden) circle

when you see a circle

you're seeing

a (hidden) line

because

the

conservation of a circle

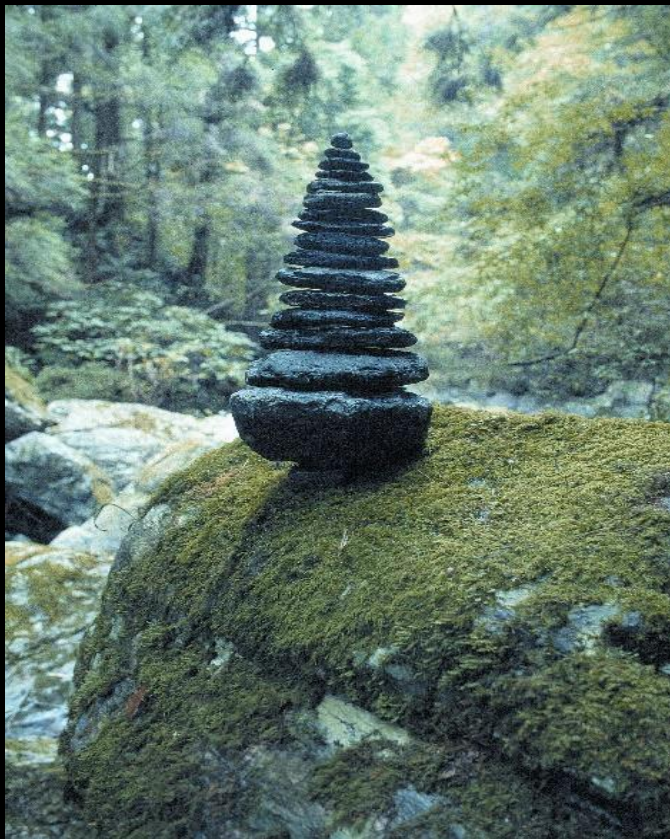

has

complete control

observation

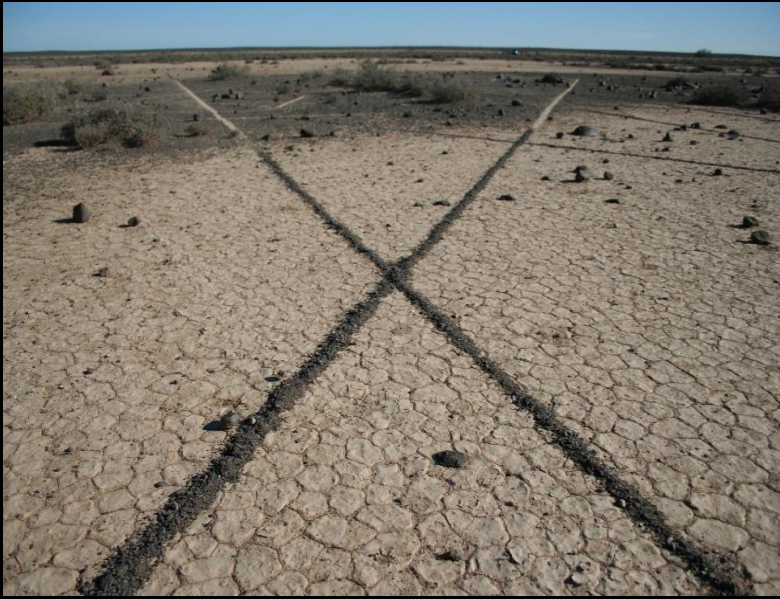

is

incomplete

because
the
opposite
of
everything

is

hidden

in

the background

any movement

makes the

opposing movement

real

thus

50-50

everything

turns

a simple dynamic

into a

chaotic and complex

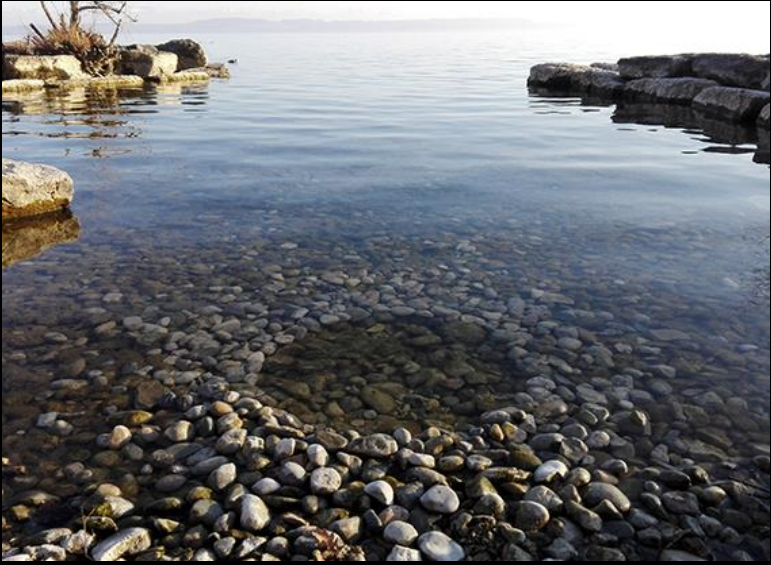

'reality'

meaning

we have to use

circular logic

in order

to experience

the truth

any 'one'

is continually entangled

with every

other

'one'

because

an uber present

circle

is

conserved

this produces

the Singularity

called

Nature

and

the Metaverse

called

Mind

known to all of us

as

one zero

and

one one

more technically

one circumference

one diameter

humans experience

the (abstract)

zero and one

as

the binary system

(in technology)

the decimal system

(in finance)

and

everything and anything

in

the media

humans experience

the (concrete)

zero and one

as

the female and male

(in biology)

yin and yang

in ancient philosophy

(and modern psychology)

mass and energy

(in physics)

representation and identification

in all

disciplines and systems

the
circular-linear relationship
between
abstract and concrete
reality

produces

symbolic systems

language and mathematics

athletics and art

technology

finance

and

the media

everything and anything

In Nature

complementarity

Is

required

for

identity

pi-diameter-circumference

Is

one-two-three

in arithmetic

zero-one-two

in physics

beginning-middle-end

in linguistics

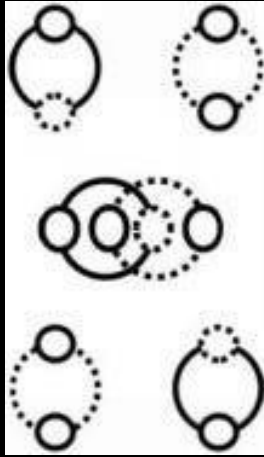

input-process-output

in technology

father-son-and-holy ghost

In religion

(0 (1) 0)

(symbolically)

the conservation of

symmetry

and sequence

in all disciplines

thus

50-50

Is the constant and the norm

so

half of me likes you

the other half

not so much

half of everything is wonderful

the other half not at all

for all of the constituents of Nature

because it is impossible

to have a half

without a whole

and always vice versa

Conservation of the Circle

Is the

equalizer in Nature

integrating
relativity and circularity

so that humans
can decide to experience
universal
peace and prosperity

line is
diameter and circumference
of circle

this is

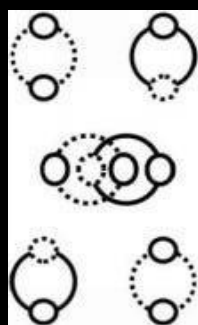

the nature of nature

also

known

as

Intelligent Design

Ilexa Yardley is a U.S. author who figured out the Conservation of the Circle is the only dynamic in Nature, and, thus a logical unification theory of everything that integrates science and religion, biology and technology, finance and physics, philosophy and psychology, chemistry and mathematics, athletics and art, politics and history, sex and relationships, paving the way for global peace and prosperity www.Circular-Reality.com

Strijdom van der Merwe is an award-winning South African land artist who shapes natural elements into geometric objects, highlighting the circular-linear relationship between nature and mathematics, individual and group, creation and destruction, life and death. He received the Medal of Honor from the South African Academy of Arts and Sciences, the Jackson Pollack-Krasner foundation grant, the Prince Claus grant, and he won the 2012 It's LIQUID international Italia contest. www.strijdom.com
