Dear Colleagues,

In this editorial, we would like to share with you important developments in the *European Journal of Therapeutics (Eur J Ther)*.

First of all, as the editorial team, we would like you to know that we hold frequent meetings to benefit our esteemed colleagues and continue to work with great devotion in line with our goal of taking the journal further. We have previously shared with you that we have applied to many indexes. It is with great pleasure that we would like to inform you that in the last few months, more of our index applications have been approved.

- Index Copernicus, as a result of this application, the ICV 2022 value of our journal was determined to be 100 (approved 2023-10-31) [1]
- BASE (Bielefeld Academic Search Engine) (approved 2023-11-30) [2]
- Sherpa Romeo (approved 2023-09-27) [3]
- MIAR (approved 2023-10-16) [4]

All indexes in our journal are currently included on the journal web page [5]

As the editorial team, we would like to inform you that we have determined a policy on this issue for our journal [6], taking into account the recommendations of important international ethics committees such as the Committee on Publication Ethics (COPE) [7] and the World Association of Medical Editors (WAME) [8], which have recently become a trendy topic of discussion about AI chatbots and academic studies prepared with the support of such tools.

As you know, when our journal was founded in 1990 [9], it was published in two yearly issues. It is an essential responsibility for us to carry our journal, which continued its publication life with three issues a year in 2009 [10] and four issues a year in 2014 [11]. With your valuable support, we would like to announce that we will increase our journal to 6 issues a year as of 2024 *(February, April, June, August, October* and *December)* with the rapidly growing progress of our journal.

Unfortunately, we cannot share the names of the referees who made significant contributions to our journal in 2023 due to the changes in the article submission interface during the year and the inaccessibility of some data in the previous interface. However, we would like to emphasize again that we are grateful to all of them for their valuable contributions. Moreover, to expand our journal's referee list, we would like to remind you that competent academics who volunteer in this regard can fill out the "*Become a Reviewer for the European Journal of Therapeutics*" form [12]. Finally, we would like to point out that we have strengthened our editorial team with an academician competent in dentistry, *Fatih Sari, DDS, PhD*.

Fatih Sari, DDS, PhD, is a new Editorial Board Member of the *Eur J Ther*. Dr. Sari is an Associate Professor in the Department of Prosthodontics at the Gaziantep University Faculty of Dentistry. He is a Vice Dean of the Faculty of Dentistry and Head of Clinical Departments. Dr. Sari is a prosthodontist and a member of the Turkish Dental Association. He has experience in implant-supported fixed prostheses, Cad/Cam applications and dental materials.

We look forward to being able to offer you a large number of high-quality and valuable articles over the coming year. In addition, we would like to thank the readers, authors and reviewers of the *Eur J Ther* for their continuous support.

Sincerely yours,
