

REWRITING THE
HISTORY OF PHILOSOPHY

Transformation and the History of Philosophy

Edited by G. Anthony Bruno and Justin Vlasits

TRANSFORMATION AND THE HISTORY OF PHILOSOPHY

From ancient conceptions of becoming a philosopher to modern discussions of psychedelic drugs, the concept of transformation plays a fascinating part in the history of philosophy. However, until now there has been no sustained exploration of the full extent of its role.

Transformation and the History of Philosophy is an outstanding survey of the history, nature, and development of the idea of transformation, from the ancient period to the twentieth century. Comprising twenty-two specially commissioned chapters by an international team of contributors, the volume is divided into four clear parts:

- Philosophy as Transformative: Ancient China, Greece, India, and Rome
- Transformation Between the Human and the Divine: Medieval and Early Modern Philosophy
- Transformation After the Copernican Revolution: Post-Kantian Philosophy
- Treatises, Pregnancies, Psychedelics, and Epiphanies: Twentieth-Century Philosophy

Each of these sections begins with an introduction by the editors. *Transformation and the History of Philosophy* is essential reading for students and researchers in the history of western and non-western philosophy, ethics, metaphysics, and aesthetics. It will also be extremely useful for those in related disciplines such as religion, sociology, and the history of ideas.

G. Anthony Bruno is Assistant Professor in the Department of Philosophy at Royal Holloway University of London, UK.

Justin Vlasits is Assistant Professor in the Department of Philosophy at the University of Illinois at Chicago, USA.

REWRITING THE HISTORY OF PHILOSOPHY

Series editors: Aaron Garrett and Pauliina Remes

The history of philosophy has undergone remarkable growth in the English language philosophical world. In addition to more and better quality translations of canonical texts there has been a parallel expansion in the study and research of sources, thinkers and subjects hitherto largely neglected in the discipline. These range from women philosophers and late ancient thinkers to new Western and non-Western sources alike. Simultaneously, there has been a methodological shift to far greater intradisciplinary and interdisciplinary perspectives in the history of philosophy, cutting across the humanities and social sciences.

Rewriting the History of Philosophy is an exciting new series that reflects these important changes in philosophy. Each volume presents a major, high quality scholarly assessment and interpretation of an important topic in the history of philosophy, from ancient times to the present day, by an outstanding team of international contributors.

THOUGHT: A PHILOSOPHICAL HISTORY
