ACKNOWLEDGEMENTS

I would like to start by expressing my gratitude to all of the disabled people and their family members who participated in our research project in Sri Lanka. This book would not have been possible without your precious participation.

I am very grateful to staff members of the Department of Social Services in Sri Lanka, Vanni Rehabilitation Organization for the Differently-Abled (VAROD), as well as the Japan International Cooperation Agency (JICA) for setting up the placement and supporting this research. I am grateful to the academic staff of the National Institute of Social Development for providing valuable information. I would also like to thank the staff members in Divisional Secretariats and non-government organisations for supporting this project.

In addition, I would like to express my sincere gratitude to my supervisor, Dr Masato Kawamori of Osaka University, for your academic support and suggestions.
